PROFESSIONAL SUMMARY

Full-stack Product Developer building AI-powered systems and real-time applications. Delivered multiple AI-driven products integrating automation and scalable architectures, with recognition and funding at national-level hackathons – including Rs. 13.6 Lakhs in funding at MSME 5.0 Hackathon 2026. Experienced in developing end-to-end solutions from idea to deployment using modern technologies. Focused on solving real-world problems through high-impact, practical solutions.

EDUCATION

CMR College of Engineering & Technology

B.Tech in Electronics and Communication Engineering (ECE)

Nov 2023 – Jun 2027

Aryabhatta Junior College

Intermediate (MPC)

Jun 2021 – Mar 2023

Percentage: 75%

TECHNICAL SKILLS

- Languages: Python, C, Java, JavaScript (ES6+), TypeScript
- Frameworks & Tools: React, Node.js, Express.js, Next.js, Flask, MongoDB, Git, Firebase, Supabase, Docker, Tailwind CSS, Figma
- AI/ML: AI API Integration, Prompt Engineering, AI Pipeline Automation, LLM-based Application Development

EXPERIENCE

MERN Developer – GalactPro

Mar 2026 – Jul 2026 · Remote

- Build and deliver full-stack web applications for real clients with real deadlines.
- Handle everything from understanding client requirements to architecting, developing, and deploying production-ready solutions using React, Node.js, and Python.

Independent Projects & Hackathons

- Built and delivered working products during national-level hackathons under strict time constraints, securing top positions.
- Built and shipped full-stack products from own ideas (MeritOne, Interpret).
- Integrated AI features and automation into real-world applications.
- Deployed and managed applications on AWS cloud.

PROJECTS

MeritOne – Skill Exchange Platform

meritone.in

- Built a real-world platform enabling users to exchange skills without money.
- Designed core system for task-based value exchange and user coordination.

Interpret – AI Communication Coach

interpret.blog

- Built an AI system that analyzes and improves user communication in real time.
- Delivers feedback on clarity, accuracy, and expression through AI evaluation.

Movellea – AI Story Visualization

- Built an AI pipeline that converts books into cinematic narrative outputs.
- Automates scene generation and story structuring using AI.

AutoClip – Fully Autonomous AI Content Pipeline

- Built an end-to-end AI agent that autonomously generates visual short-form video content on topics like history of fruits, vegetables, and similar educational themes.
- Automates the full pipeline – research, script generation, visual creation, and publishing – with zero manual interaction.
- Deploys content automatically across platforms including YouTube and Instagram.

ACHIEVEMENTS & HACKATHONS

- Funded – Rs. 13.6 Lakhs at MSME 5.0 Hackathon 2026 for Movellea (AI Story Visualization project)
- Runner-up at NIT Rourkela Hackathon – Built AI project in collaboration with IGDC (Jan 2026)
- Runner-up at GITAM Havana National Level Hackathon (Mar 2026)
- Top Finalist at HackWave – Sreenidhi Institute of Science & Technology, Hyderabad (2025)
- Top Finalist at WebWars – CMR College of Engineering & Technology (2025)
- Winner of the Autobots Workshop Competition conducted by Technotrant at CMRCET

CERTIFICATIONS

- ServiceNow: Certified System Administrator (CSA)
- ServiceNow: Certified Application Developer (CAD)
- Scaler: JavaScript Certification (2024)
